**GlasWeld Offers Free Tickets to New Disney Movie *Earth* in
Celebration of the Sustainability of Glass Repair**

Glass repair makes everyday Earth Day: it is a sustainable, environmentally friendly option for damaged glass

April 22, 2009 – Bend, Oregon - GlasWeld, an international solutions provider for the glass repair industry, today announced a new special offer to help raise awareness of global environmental issues. For every purchase of GlasWeld glass repair equipment, supplies or training totaling \$200 or more, GlasWeld will include two free movie tickets to see Disney's new movie, *Earth*.

“Part of our corporate mission centers around sustainability; and glass repair, through saving glass and keeping it out of landfills, is sustainable by nature,” said Mike Boyle, president of GlasWeld. “We saw a chance to reach an even larger audience with an environmental message by providing a free opportunity to see Disney's new *Earth* documentary.”

Earth is the first film in the new DisneyNature series, and is narrated by James Earl Jones. The documentary follows three animal families and their journey across the planet. The movie opens today, Earth Day 2009, in select markets. GlasWeld is offering free tickets as long as the movie is playing in major theaters around the country.

About GlasWeld

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company's flagship *Gforce* Scratch Removal System for glass scratch removal and *G3fusion* Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld's product lines have been developed based on decades of industry research, development and customer feedback. Because glass repair is intrinsically sustainable, GlasWeld has integrated creative, tangible environmental initiatives into its daily operations, including ongoing education for the greater glass industry.
