

National Windshield Repair Association to Sponsor Windshield Repair Olympics

The National Windshield Repair Association (NWRA) is proud to announce its sponsorship and support of the 2007 Walt Gorman Memorial Windshield Repair Olympics – the international competition for the repair industry.

The inaugural Windshield Repair Olympics was held this past November 3-4, 2006 at the Mandalay Bay Convention Center in Las Vegas, Nev. It plans to return to Las Vegas in the fall of 2007 for the 2nd annual event to continue the educational experience for those in and related to the repair industry.

“We view this as a perfect opportunity to meld the association’s goals of educating our members and potential members of the benefits repair offers to our customers,” states Paul Syfko, president of NWRA.

“The first year went very well and we certainly want those technicians to know how much we support their efforts and encourage an opportunity like this to arise for those in our industry,” said Syfko.

NWRA is recognized nationally and worldwide as a professional source of reliable information on the windshield repair industry. Interested parties including commercial, government and trade organizations have come to NWRA for information and consultation. We are the only trade association devoted solely to the windshield repair industry.

Information regarding the NWRA is available online at www.nwrassn.org or call 540-720-7484.
