GlasWeld Launches New Products and Services at the Independent Glass Association Conference

Glass repair one-stop-shop comes to the 2009 IGA event in Florida

13 May 2009 (Fort Myers, Florida) – GlasWeld, a complete solutions provider for the glass repair industry, will be presenting several new products and services for the glass industry at the Independent Glass Association's 2009 Conference and Spring Auto Glass Show in Florida, May 12-14.

These new products will be presented at the show:

- The **GRV™ (Glass Repair Vespa)** integrates **G3fusion** glass repair technology with efficient, eye-catching transportation. High visibility combined with ease of use and low consumption help companies save on hard costs like fuel, while raising brand awareness and increasing the scope of their service areas.
- The **ionCur™** is the first UV LED curing lamp designed specifically for glass repair. The ionCur emits an intense ultraviolet wave pattern at just the right frequency to optimally cure the **Gfusion** series resins. The ionCur lasts up to 10,000 hours and contains no toxic chemicals, keeping mercury filled florescent bulbs out of our landfills.
- **Quality Technician Testing** by GlasWeld gives glass repair companies an opportunity to audit technician performance, no matter what equipment they use. This program is the only repair assessment test that measures key repair traits including the reflection and refraction of each completed repair.
- **AdWerks** is GlasWeld's in-house advertising agency which has years of first-hand experience in the glass industry. This agency specializes in print and interactive media campaigns—from print advertising and collateral materials to video, social media and online communications as well as public and media relations.

In addition to these new items, GlasWeld will also be displaying its main glass repair equipment product lines: the **G3fusion™ Auto Glass Repair System**; the **Gforce™ Scratch Removal System**; and **Gshield™ Glass Treatment**. Information will be available on GlasWeld's extensive training options, including its new **Distance Learning Program** for glass repair technicians and its monthly training courses for advanced techniques in auto glass repair.

Visitors to the show can also learn more about **GlasWeld Management Solutions**, which provides consulting, management and conservation programs to the glass industry.

About GlasWeld

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company's flagship **Gforce** Scratch Removal System for glass scratch removal and **G3fusion** Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld's product lines have been developed based on decades of industry research, development and customer feedback. Because glass repair is intrinsically sustainable, GlasWeld has integrated creative, tangible environmental initiatives into its daily operations, including ongoing education for the greater glass industry.
