

## Automotive Products

March 17, 2006

To Our Valued Customers,

Effective with orders placed on or after April 3, 2006, we will institute a 3% price increase on all tempered and laminated glass parts shipped from our National Distribution Center in Findlay, Ohio.

This is the first increase in several years, and is made necessary by the increase in manufacturing and transportation costs during that time.

Your salesman will be contacting you with a new price list prior to April 3.

As always, we appreciate the opportunity to continue to supply you with high-quality, Made-in-America Guardian auto glass.

Dennis Braney

Director of Distribution  
Guardian Automotive Products
