FOR IMMEDIATE RELEASE

Mitchell releases version 5.3 of *GlassMate*; Includes Cost-Based Pricing Capability

SAN DIEGO, January 2, 2007 – Mitchell Glass, a division of Mitchell International, has released GlassMate® Version 5.3 to the Auto Glass market.

For the first time, GlassMate supports the capability to generate customer invoices based on the cost of the part to the auto glass retailer. In addition, retailers can load supplier price lists into the software for quick cost-lookups.

“Version 5.3 represents a whole new chapter in the evolution of the GlassMate product. Now retailers can rely on our easy-to-use system to manage all types of transactions, whether they be insurance-oriented or not.”, said James Patterson, Director of Glass Product Management at Mitchell International. “We expect our customers will be able to immediately take advantage of the new benefits GlassMate has to offer, and remain a step ahead in this very competitive environment.”

In addition to the ability to price work based on cost, GlassMate 5.3 includes a convenient ‘What-If’ calculator and the ability to track cost on every part sold. These tools are specifically designed to help shops manage profitability and margins.

More information about *GlassMate* software is available at www.nags.com or by calling (800) 551-4012.

About GlassMate

GlassMate software, a leading point-of-sale system for the auto glass repair and replacement industry, delivers efficiency and automation to the AGRR market.
