**AEGIS® Tools International, Inc. Granted Injunction Against  
PMA Tools AG, Germany**

AEGIS® Tools International, Inc., Madison, Wisconsin, was granted a preliminary injunction on Friday, September 12 by the Düsseldorf Court, Germany, against PMA Tools AG, Germany for infringement on the patented design of the SOLO™ Windshield Setting Tool. The injunction will prevent PMA Tools from showing their WIS Pro installation tool at the upcoming Automechanika fair in Frankfurt, Germany, September 16<sup>th</sup> to the 21<sup>st</sup>.

Robert Birkhauser, President of AEGIS®, who will be attending the trade fair, was pleased that the court agreed with his claims of infringement. “We have several European distributors marketing our SOLO™ tools, and the injunction will protect their business efforts and ours,” he commented.

AEGIS® was granted U. S. Patent No. 7,322,092 for its SOLO™ Windshield Installation Tool in March 2008. The labor-saving SOLO™ allows a single auto glass technician to install a windshield that would normally require two technicians. The key features of the SOLO™ are: four suction cups, two each for the door glass and windshield, for added safety and adaptability to all glass curvatures; a single-piece, hardened steel supporting rod with industrial-strength bearings for smooth and steady movement; and a drop-down pivot pin that eliminates any risk of disturbing the urethane seal during setting.

The company recently introduced the SOLO™ II, an improved version of the original device. The new tool features a reversible and extendable arm which allows a technician to work from either side of the vehicle, and on vehicles with virtually any door glass configuration.

With 25 years experience, AEGIS® Tools International, Inc. is an industry leader in designing windshield repair systems and auto glass replacement tools, and in supplying top-quality auto glass replacement and repair products to professionals in over 50 countries around the world. The company

focuses on designing tools that promote safety and efficiency for the technician, and safe installations for consumers.

For more information on AEGIS® and the SOLO™, and to view a video demonstration, visit [www.aegistools.com](http://www.aegistools.com).
