**AGRSS COUNCIL TO INTRODUCE VALIDATION FIRM
Company Will Be Introduced at Conference**

The Auto Glass Replacement Safety Standards Council Inc. (AGRSS) will introduce its third-party validation company at the 2008 International Auto Glass Safety Conference. The conference will be held November 5 - 6 at the Mandalay Bay Convention Center in Las Vegas during Auto Glass Week™ in coordination with the International Autobody Congress and Exposition ([NACE](#)).

The independent third-party validation firm will conduct on-site validation reviews for AGRSS and will be introduced at the Conference. Representatives from the company also will participate in the seminars focusing on the validation program. Earlier this month, more than 500 industry leaders took part in an AGRSS Validation webinar held online and a follow-up, along with the introduction of the validation company, will be held at the conference.

AGRSS Conference attendees will receive two full days of quality education on important industry topics; networking opportunities with colleagues and related industry peers; admission to the AGRSS welcoming cocktail party and charity auction; admission to the NACE trade show; and admission to the [Auto Glass Technician Olympics](#); and admission to the [Walt Gorman Memorial Windshield Repair Olympics](#) all for one registration fee. Both competitions are separate events but organizers have made arrangements for AGRSS badge holders to attend both, as well as the NACE show, at no additional charge.

The pre-registration rate for AGRSS-Registered company attendees is \$150; non-registered companies will be charged \$225 per attendee. Pre-registration closes October 17. Interested participants can visit www.agrсс.com/conference to register or for more information.

AGRSS is a not-for-profit organization dedicated to the safe replacement of auto glass. AGRSS was founded and is supported by companies in the auto glass replacement industry that keep safe installation as their primary goal. The Council is also accredited by the American National Standard Institute (ANSI) – a standard development organization – and has developed North America's only auto glass replacement standard, the AGRSS Standard (ANSI/AGRSS 002-2002). The AGRSS Standard addresses procedures, education and product performance.
