DuPont Glass Laminating Solutions Announces DuPont™ Butacite® PVB Price Increase

WILMINGTON, Del., Nov. 19, 2007 - DuPont Glass Laminating Solutions today announced a price increase of 15 percent on all grades of DuPont(tm) Butacite(r) polyvinyl butyral interlayer effective January 1, 2008. The price increase will be applied globally.

DuPont stated that this action is required due to the continued increases in petrochemical feedstock, energy, freight and distribution costs. "The shortage of VAM and the rising cost of ethane and ethylene, primary feedstocks for PVB manufacture, have increased PVB costs substantially in 2007. Increasing energy prices have contributed to increases in freight and distribution costs globally," Torkel Rhenman, global business director, DuPont Glass Laminating Solutions, said.

DuPont Glass Laminating Solutions provides materials, services and innovations for a better, safer world. The business operates within the DuPont Packaging & Industrial Polymers strategic business unit, part of DuPont's \$5.3 billion Performance Materials growth platform.

DuPont is a science company. Founded in 1802, DuPont puts science to work by solving problems and creating solutions that make people's lives better, safer and easier. Operating in more than 70 countries, the company offers a wide range of products and services to markets including agriculture, nutrition, electronics, communications, safety and protection, home and construction, transportation and apparel.
