### **ECONOMIC STIMULUS PACKAGE FOR GLASS REPAIR INDUSTRY**

*Leading [glass repair](#) company announces stimulus package for glass repair professionals*

13 February 2009 (Bend, Oregon) – GlasWeld, an international solutions provider for the [glass repair](#) industry, today announced that it has developed a “stimulus” package for glass repair professionals in the United States. In order to help technicians in this time of economic uncertainty, GlasWeld is offering hundreds of dollars in savings to existing and new customers to help solidify their position in the industry. Specific offerings include deeply discounted online training packages and savings on glass repair equipment.

“We decided to follow the national ‘bail-out’ trend and apply it to the [glass repair](#) industry with our stimulus package,” said Mike Boyle, president of GlasWeld. “Basically, we are offering huge savings to new and existing customers in order to get them started in this lucrative and necessary business. Many people are out there looking for ways to make money right now and glass repair is a great option.”

Across the nation, many people are choosing repair versus replacement when it comes to a damaged windshield. It is a less expensive option and glass repair technicians are actually seeing business rise in this economic downturn. GlasWeld’s stimulus package gives people a great opportunity to start a new business at a greatly discounted price.

For more information on GlasWeld’s stimulus package go to, [www.glasweld.com/stimulus](http://www.glasweld.com/stimulus) or call 800.321.2597.

#### ***About GlasWeld***

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company’s flagship *Gforce* Scratch Removal System for glass scratch removal and *G3fusion* Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld recently revolutionized the industry by launching a robust online training platform that can improve the level of glass repair around the world through education. GlasWeld’s product lines have been developed based on decades of industry research, development and customer feedback. Because glass repair is intrinsically sustainable, GlasWeld has integrated creative, tangible environmental initiatives into its daily operations, including ongoing education for the greater glass industry.
