Glass Technology Inc. and Lavenir Provide Successful Results for Windshield Repair Competition in Japan

Japan Auto Glass Union (JAGU), chaired by Hisashi Ebina, held the annual Auto After Market Expo in Tokyo, Japan at Big Sight, Ariake on March 14, 2009. Representatives from seven different JAGU branch offices in Japan (Hokkaido, Tohoku, Kanto, Chubu, Kinki, Chugoku-Shikoku, and Kyushu regions) were chosen to compete in this annual competition. The representative at each branch office was selected from the top five qualifiers of the level 1 certificate exam, conducted each year by JAGU. The competition aimed to promote understanding and quality in techniques of auto glass repair and maintenance.

Of the seven contestants, four were users of Glass Technology's windshield repair equipment. The winner of the JAGU windshield repair competition was Kennichi Kumazaki from Nagoya, a long standing customer of [Lavenir](#) and user of Glass Technology's [Spectrum windshield repair equipment](#).

“For those that have not witnessed this competition first hand, it is refreshing to see the level of commitment and support from both the auto glass repair, and replacement industries working together to promote quality and safety,” remarked Kerry Wanstrath - President of Glass Technology

Details:

Glass Technology has specialized in manufacturing premium windshield repair and glass restoration equipment for 25 years. Based out of Durango, Colorado, Glass Technology has offered top industry training and support to both the auto glass and architectural glass industries. Glass Technology's distribution network spans over 45 countries, providing the most advanced industry technology and service available.
