## **GLASWELD PRESENTS NEW GLASS REPAIR TECHNOLOGY AT MARS INTERNATIONAL ANNUAL CONVENTION**

18 February 2008 (Bend, Oregon) – GlasWeld, an Oregon-based complete solutions provider for the glass repair industry, will present its new G3 ProVac auto glass repair injector at the MARS International annual conference this week. GlasWeld, a preferred vendor for the international auto restoration company, recently developed ground-breaking windshield repair technology with the G3 and this week will be the first formal presentation for MARS operators.

“GlasWeld has always met our high expectations for quality and customer service – attributes that we are then able to pass on to our own customers,” said Eric Howe, Director of Retail Operations for MARS International. “We are looking forward to learning about the latest technology that their research and development department has developed for our technicians. Better results means happier clients, helping us build our reputation in the marketplace.”

GlasWeld has been MARS’ complete glass repair vendor for the last 12 years, introducing both its auto glass repair and glass scratch removal technology to their technicians in the United States. These glass repair services integrate nicely with the company’s goal to make pre-owned vehicles look and feel new through advanced restoration services.

The new G3 ProVac injector being presented at the convention is based on years of research and development by the GlasWeld Technical Services team. The resin injection system removes air and moisture from the break before ever coming into contact with resin, producing faster, higher quality repairs than other repair procedures. GlasWeld guarantees its system and process to meet and even exceed new American National Standards Institute guidelines for windshield repair.

### ***About GlasWeld***

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company’s flagship *Gforce* Scratch Removal System for glass scratch removal and *G3fusion* Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld’s product lines have been developed based on decades of industry research, development and customer feedback. Because glass repair is

### ***About Miracle Appearance Reconditioning Services (M.A.R.S.)***

M.A.R.S. International specializes in TOTAL automotive appearance reconditioning: making pre-owned vehicles look and feel new by repairing bumpers, removing scratches, and providing multiple services that go beyond typical detailing capabilities such as stain and odor removal. M.A.R.S. International has been recruiting, equipping, training, and certifying Operators since 1998 and has successfully established hundreds of independent M.A.R.S. operations throughout the United States. The company is continually working to research and provide its Operators with the best equipment, training, and technical support. More information can be found at [www.marsinternational.com](http://www.marsinternational.com).
