GLASWELD PRESENTS TO SPAIN'S CESVIMAP ON THE SCIENCE OF GLASS

International automobile damage research and training company looks to GlasWeld for answers in glass repair

12 May 2008 (Bend, OR) – Mike Boyle, president of GlasWeld, an international solutions provider for the glass repair industry, visited Cesvimap in Spain last month to educate key staff members on the science of glass and glass repair. Cesvimap, which provides research and training on automobile damage, is seeking to incorporate GlasWeld's information into its numerous publications and training activities regarding the methodology of vehicle repair.

“With Cesvimap's goals of providing scientifically based data on auto damage, GlasWeld is a perfect fit for the glass repair portion of their studies,” said Boyle. “We have decades of research behind our products to ensure that all our solutions are based in solid science. GlasWeld's data and services integrated perfectly with Cesvimap's existing offerings.”

Cesvimap is an automobile research facility, which covers vehicle repair due to damage resulting from road traffic accidents involving passenger cars, industrial vehicles and motorcycles. The company then passes on the discovered information and conclusions to repair shop staff, insurance companies, vehicle manufacturers, claims adjusters, and teachers and students of technical colleges and others around the world. This model ensures that the company can guarantee a high standard of quality.

GlasWeld's presentation earlier this month was the first step in solidifying an ongoing relationship with Cesvimap, including providing equipment, training materials and support through its training network.

About GlasWeld

Based in Bend, Oregon, GlasWeld provides complete glass repair solutions—from revolutionary equipment to unparalleled training programs and technical support—for both flat glass and auto glass. The company's proprietary *Gforce* Scratch Removal System for glass scratch removal and *Gfusion* Auto Glass Repair System for windshield repair are distributed worldwide through an international distribution network. GlasWeld's product line has been developed based on decades of industry research, development and customer feedback. To celebrate its 25th anniversary in 2007, GlasWeld has expanded its vision from saving glass around the world to saving the global environment through creative, tangible initiatives.
