GLASS TECHNOLOGY INAUGURAL KOREAN EXHIBITION

COEX EXPO Covers South Korea

September 23, 2009

Seoul, Korea – Glass Technology Korea had its inaugural exhibition at the COEX Expo center in Seoul, South Korea. Restoration and repair businesses in South Korea are blooming, with a trend towards Globalization and green initiatives. Attendees at the expo represented a more than \$50 billion dollar industry in the region.

GT Korea holds exclusive rights over the whole of South Korea for the distribution of Glass Technology Inc. equipment and supplies. Based on growing demand, [Glass Technology, Inc.](http://www.gtglass.com) forecasts positive growth throughout the region in the fields of windshield repair, headlight restoration, and glass scratch removal throughout the territory.

Jae-Pil Yun, president of GT Korea, said after several individual consults with attendees: “the trade show was very successful; the responses to glass repair and glass restoration were overwhelming and I have high expectations of future developments.” Buyers throughout the region expressed growing interest in implementing glass repair and restoration with a growing trend towards conservation. Immediately after wrapping up the expo, Glass Technology Korea opened up a second satellite location.
