SRP AND BTB ANNOUNCE NORTH AMERICAN AGREEMENT

SAVAGE, MN – October 16, 2007 — Shat R Proof Corp. of Savage, MN., is pleased to announce that BTB Tools of Bendigo, Australia has appointed SRP as the Master Distributor of BTB Auto Glass and Body Shop Tools for North America.

Under the agreement, SRP will take over BTB's existing North American business and operations and incorporate them into their existing automotive aftermarket business located in Savage, Minnesota.

"We could not be more pleased about this arrangement since it complements our core business so well," says Keith Beveridge, Sr. Vice President of Shat R Proof Corp. "BTB has such a great brand in the glass, auto body and recycler markets. We hope with the addition of our corporate structure, resources and our extensive sales force, we can grow the BTB business in North America by leaps and bounds in all market segments."

Trevor Lock, director of BTB Automotive Pty. Ltd., which is the parent company of BTB Auto Glass and Body Shop Tools, echoes Beveridge's comments. "We have been looking for a way to invigorate sales in North America for a number of years. It has been difficult with a majority of our staff located halfway around the world and only a small presence in North America." Lock continues, "This is really a good fit for us, we have been doing business with SRP and their parent company [TCG International] for a number of years and we have a comfort level with them."

SRP will continue to supply products and technical services to existing BTB Tool distributors and customers in North America. "Our goal is to make this as seamless as possible for our customers," says David Osland, Vice President of Marketing and Product Development for Shat R Proof Corp. "The only difference we hope customers will notice is an increase in service abilities and manpower."

Shat R Proof Corp. offers products to the auto glass and flat glass markets under the SRP brand. These products include auto glass adhesives, cleaning products, windshield repair kits, AGR tools, glass restoration products, and Novus Plastic Polish.
