

Protect your windshield.

IT'S A JUNGLE OUT THERE.

The last thing you should worry about is needing a new windshield. Damage can happen anywhere anytime – without warning – whether you're off-roading or commuting to work.

So protect yourself. The next time your windshield needs replacing, ask for a Mopar Windshield Made with Corning Gorilla Glass. It's the lightweight, durable glass that utilizes the same strengthening technology as cell phone screens. Mopar Windshields with Gorilla Glass help minimize the need for costly repairs. Plus, they've been validated in testing and are backed by a 2-year limited warranty.

Call your dealer or glass installer today to order a Mopar Windshield with Gorilla Glass or visit [Mopar.com/gorilla](https://www.mopar.com/gorilla) to learn more.

NEW!

Part Number 68522634AA (Camera + Heater w/Antenna) | NAGS Number DW02730GTY

2007-2018 JK Jeep Wrangler vehicles

Part Number 68401325AB | NAGS Number DW02479GTN

The Mopar Windshield with Gorilla Glass helps defend against many common windshield fractures.

Sharp Impact

- Typically small sharp stone impact
- Characteristic "star" (aka radial) crack
- Crack extends fully through the outer glass ply (surfaces one and two)

Blunt Impact

- Typically small blunt rock/debris impact
- Characteristic "bullseye" flaw, may see surrounding star crack
- Crack is on surface one of outer ply, may extend to surface two of outer ply

Biaxial Flexure

- Larger blunt object like hail or stone
- Sharp impact on surface one
- Long cracks "running" from a central point
- Crack is commonly on inner ply surface four, sometimes on outer ply surface two
